Mr. Edmond Casey informs us that the output of mineral from his prospect on the Casey tract, about a mile west of town, last week was 9,760 pounds, working only three men. Since he first made the discovery of ore there, just a year ago, he has taken out 200,000 pounds from his own claim, and the value of the entire Wm. Cooper, of Brazil, was in town output of the diggings for the year is in excess of \$7,000. Messrs. Vanvoorhis and Essmeyer also have a goodpaying prospect in the same diggings.

> From parties coming in from Relgrade we learn that an important discovery of disseminated lead ore was receptly made on the farm of Charles Lucas, about two miles south of Bel-grade. Mr. Lucas made the discovery while sinking a well. The ore was first struck at a depth of twenty-two feet, and has been penetrated to a depth of ten feet without passing through the lead, the ore growing richer as the depth increases. Experts who have examined specimens of the ore say that it is identical with that found in the Bonne Terre and Flat River districts. This flud will undoubtedly create a min.ng boom in that locality.
